

AmerisourceBergen

A healthcare professional, likely a nurse or technician, is shown in profile, wearing a white surgical cap, a light blue surgical mask, and blue scrubs. They are also wearing blue gloves. They are focused on a piece of medical equipment, possibly a syringe or a small container, which is part of a larger device. The background is a soft-focus clinical setting. A large, semi-transparent pink overlay covers the bottom left portion of the image, containing the text 'USP <800> product guide' in white.

BD PhaSeal™ drug vial access device

BD PhaSeal™ drug vial access device permanently affixes to a drug vial. It functions as a pressure equalization device, utilizing a sealed expansion chamber that establishes and maintains neutral pressure when air or diluent is injected into or aspirated from the vial.
